

SMART HOME AUTOMATION

- Professionally installed Loxone mini server and panel that is non-cloud based. It integrates intelligently the homes lights, blinds, security, heat and music."
 - The Smart Home solution from Loxone isn't about complicated control panels to turn your lights on. On the contrary, it simply knows what to do and takes care of thousands of tasks for you and your family throughout the year. It looks after the heating, lighting, shading and more – all by itself. This gives you more time for your family, friends or just time for yourself to relax.
 - Unlike many other smart home solutions, Loxone does not share your personal information with third parties. Loxone works completely independently of a central data cloud. In this way, data such as presence, temperature, alarm modes remain where they belong – with you.
 - Music, shading, lighting, security, heating & cooling – everything that makes up a home is brought together and managed intelligently.
-
